

# Údolím lapků z Drakova Valley Nature Trail

 **15,7 km**

 **4,5 h**

 **257 m**

The route is 12 km long, or 16.5 km long from the centre of Vrbno pod Pradědem. It leads along the Černá Opava River from Vrbno – Mnichov through Drakov to the Rejvíz National Nature Preserve. It has 10 stops with information about flora, fauna and history. There used to be an old trade route here, and iron ore and gold were mined in the area. An interesting stop is Lorenzo's smelter, where iron ore was melted. There are ruins of old guard castles, shrouded in legends about traps and robbers.
