

# Velká Kotlina Nature Trail

 **8 km**

 **19 km**

 **4 h**

 **676 m**

The trail is marked in blue. It starts in Karlov pod Pradědem and continues towards the Ovčárna Hotel, where it ends. It runs along the Moravice River through the Praděd National Nature Preserve. There are 11 stops along the route, related to botany, zoology and geology. The Velká kotlina (Great Basin) is characterized by a rich occurrence of endemics and is often referred to as the “Botanical Garden of the Jeseník Mountains”. The guide through the nature trail is the *Jesenikia filiformis* snow fly, a new species of insect that was discovered in the Jeseník Mountains. We do not recommend this route in winter.
